

Technical Writer Test - Customer Release Notes

January, 2021

Project

- Based on the following updates made in the latest version of our product, please construct a Customer Release Note.
- Feel free to organize the information and the document structure in the manner you feel best conveys the message.

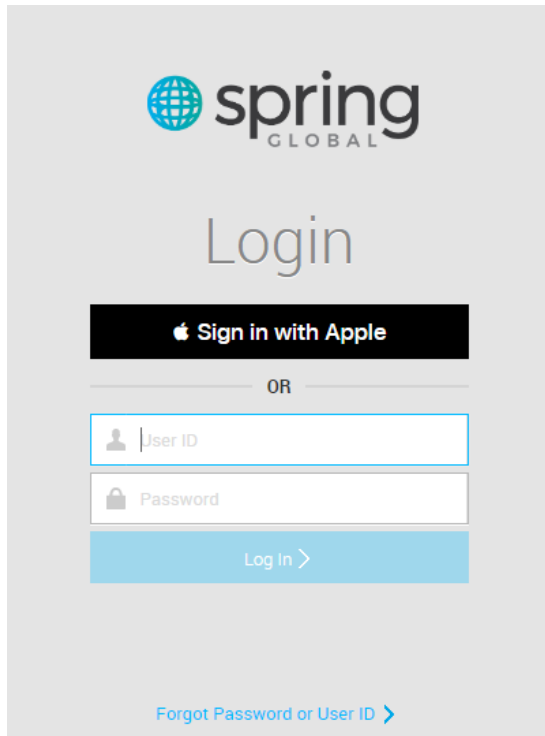

Sign in with Apple ID

Now it's possible to sign in in mSeries (Spring Global App) portal using Apple ID

Apple ID Authentication feature is intended to login users using Apple as authentication provider.

This feature adds "Sign in with Apple" button and 'OR' separator on HQPortal's login page as shown in the image below.

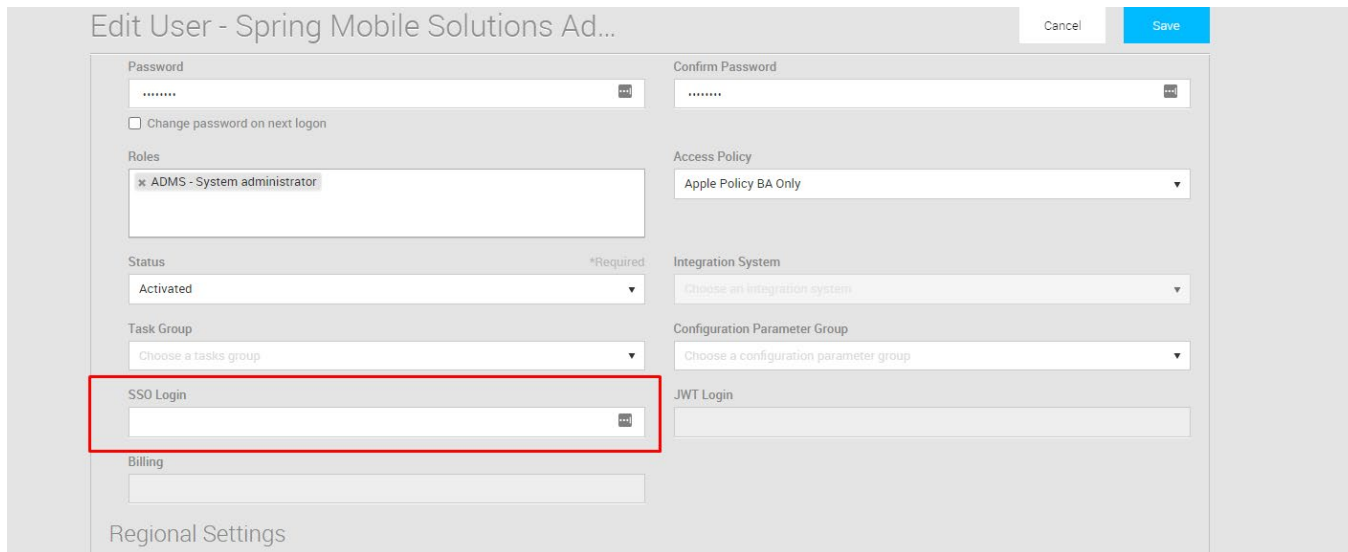

The image shows a login page for Spring Global. At the top is the Spring Global logo, which consists of a teal globe icon followed by the word "spring" in a bold, sans-serif font and "GLOBAL" in a smaller, all-caps font below it. Below the logo is the word "Login" in a large, light gray, sans-serif font. Underneath "Login" is a black button with the Apple logo and the text "Sign in with Apple" in white. Below this button is a light gray horizontal line with the word "OR" centered in a small, gray font. Under the "OR" separator are two input fields: the first is labeled "User ID" with a small person icon to its left, and the second is labeled "Password" with a small lock icon to its left. Below these fields is a blue button with the text "Log in >". At the bottom of the page is a link that says "Forgot Password or User ID >" in a small, blue font. A large, faint, light gray globe icon is visible in the bottom right corner of the page.

Sign in with Apple ID

How to configure

Apple ID account should be linked to *HQPortal* user.

- With an admin profile go to **Administration -> User -> [Select desired user] -> User Profile tab -> SSO Login** then, define the Apple ID account than will be linked to this user.

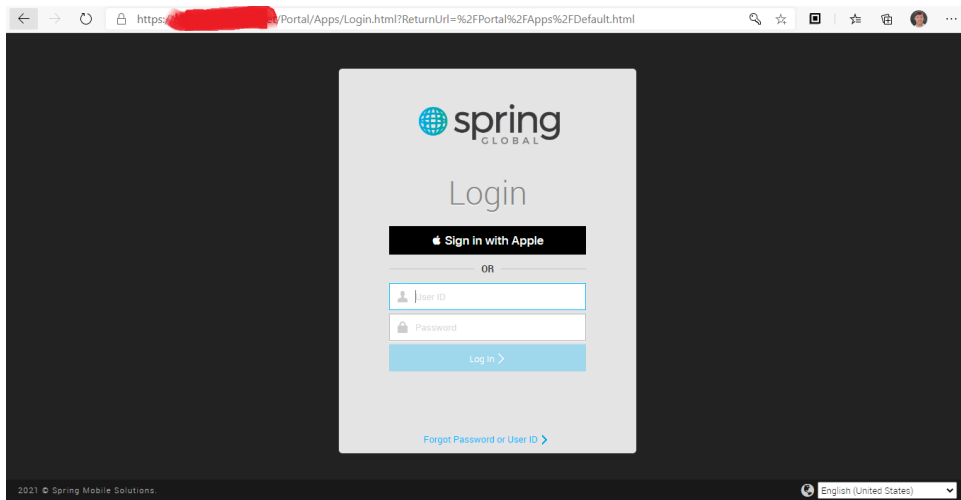

The screenshot shows the 'Edit User' interface for a user named 'Spring Mobile Solutions Ad...'. The form includes fields for Password, Confirm Password, Roles (set to 'ADMS - System administrator'), Access Policy (set to 'Apple Policy BA Only'), Status (set to 'Activated'), Integration System, Configuration Parameter Group, Task Group, SSO Login (highlighted with a red box), and Billing. A 'Regional Settings' section is visible at the bottom. The form has 'Cancel' and 'Save' buttons at the top right.

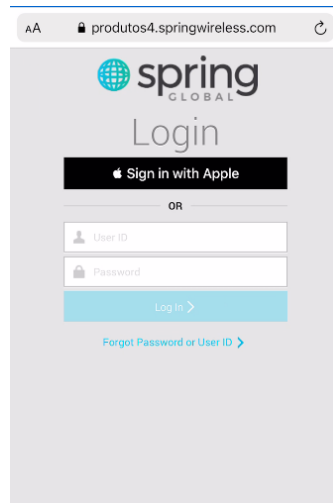

Sign in with Apple ID

How to use

Open your environment HQ Portal URL in a browser (from a Desktop or a mobile device) and try to log in with the mSeries user that was previously associated to the AppleID.

Desktop view

Mobile View

Order Edit Improved Rules

To improve the usability and prevent unwanted and accidental Order Edits additional Rules are being added.

When editing an Order that has previously been Finalised you now need to select an Edit button. This helps us to better manage when users just view an Order and don't edit it. The new edit button is present in both "My Order" and "Order Detail" screens and will be visible whenever the user has the appropriate permissions to edit a finalised order. Clicking the button will reopen the order as exemplified bellow:

Order Edit Improved Rules

Order Edit Improved Rules

Order Edit can now be managed by a new Configuration Parameter "EnableEditableOrder" so it can be enabled/disabled by Bottler or Region within a Bottler. If disabled, the Edit button above is not available. Additionally, the Flag – Order Editable – is also hidden.

Bug Fixes

Return Reason Issue

Return reason selection for first order displayed when tapping on Material description in Multi-Order scenario

Solution: In multiorder removed behavior because not make sense for single order when tap in product, price, or spinner, the selection return reason will be shown, but for multi-order, only in the price or spinner for the self-order, see images touchable areas below:
